'1-19 Sudarshan', Near Dooravani Kendra, Bommarabettu, Hiriadka, Udupi, Karnataka 576113

PROFESSIONAL SUMMARY

Product leader with 6 years of experience owning conversational and customer-support products end to end, across chat, voice, WhatsApp and web self-service. As Co-founder & Chief Product Officer of Exelon Circuits, an ISO 9001, ISO 27001 and ISO 20000-1 certified technology company, I have shipped WhatsApp commerce and agent-handoff platforms, AI voice agents for reception and in-room service, deployed website chatbots, and complaint-management systems for two state utilities serving millions of consumers.

My work sits where automation meets live agents: designing how a user moves from a bot or self-service flow to a human, defining the routing, authentication, context-sharing and CRM integrations that make the transition seamless, and closing the loop with post-interaction feedback. I write detailed integration requirements, read and produce system architecture diagrams, and lead cross-functional teams of 11-13 across engineering, design, content and localization.

CORE COMPETENCIES

- **Conversational Product:** Chat and voice journey design, bot-to-live-agent handoff, IVR and telephony flows, WhatsApp Business API, agent consoles, intent and escalation logic
- **Support Experience:** Self-service and help-centre design, ticket routing and SLA management, escalation matrices, CSAT and post-interaction feedback, quality review workflows
- **Integrations & Technical Fluency:** API design and evaluation, authentication and context passing, CRM and third-party integrations, data flows, architecture trade-offs, webhook and event handling
- **Product Management:** Roadmapping, MVP definition, prioritisation, BRD/SRS and detailed requirement writing, user stories and acceptance criteria, stakeholder management
- **Data & Experimentation:** Metric definition, funnel and drop-off analysis, dashboards, A/B and pilot rollouts, using data to validate decisions
- **Cross-functional Delivery:** Scrum and Kanban, sprint planning, UAT and go-live, working across engineering, design, content, operations and localization teams

TECHNICAL SKILLS

Conversational & Messaging	WhatsApp Business API, chatbot and virtual-assistant platforms, AI voice agents, SIP/VoIP telephony, SMS and email messaging
AI & Automation	LLM-based assistants, intent handling and routing logic, speech-to-text and text-to-speech workflows, AI-assisted product delivery
Product & Analytics	BRD/SRS authoring, user stories, journey mapping, wireframing (Figma, Adobe XD), funnel and event analytics, dashboards
Integrations	REST APIs, webhooks, OAuth and token-based auth, CRM and ERP integrations, payment gateways, third-party APIs
Engineering (hands-on)	React.js, Next.js, Vue.js, Nuxt.js, TypeScript, Node.js, Express.js, Python
Mobile	React Native, Ionic, Capacitor, PWA, offline-first sync
Data	MongoDB, SQL, Firebase, Realm
Cloud & DevOps	AWS, Microsoft Azure, Google Cloud, DigitalOcean, Cloudflare, Docker, CI/CD, Git/GitHub

PROFESSIONAL EXPERIENCE

Co-founder & Chief Product Officer

Jul 2021 – Present

Exelon Circuits Pvt. Ltd., Mangaluru, India

- Own product strategy and delivery for a portfolio of 50+ client engagements, with conversational support, CRM and self-service platforms as a core product line.
- Built and shipped WhatAStore, a WhatsApp Business API commerce platform with a paired Admin-Agent Portal, defining how automated conversations hand off to live agents with full conversation context, agent assignment and queue handling.
- Led an AI voice-agent product for a hospitality client covering reception, in-room service and dining requests, plus automated post-stay feedback calls, designing the call flows, escalation to human staff, and the feedback capture loop.
- Delivered consumer complaint-management platforms for two state electricity boards (MESCOM and GESCOM): intake across channels, categorisation, routing to field teams, SLA tracking, escalation and resolution confirmation.
- Shipped customer-facing chatbots for retail and studio clients, handling enquiry capture, response flows and handoff to a human when intent falls outside the bot's scope.

- Defined integration requirements and partnered with engineering on cross-system flows spanning authentication, message routing, context sharing, CRM records and notification delivery, evaluating API connections, data flows and architectural trade-offs.
- Authored 20+ BRDs and SRS documents that engineering built directly from, including role and permission matrices, escalation rules, state machines and acceptance criteria.
- Designed feedback and quality mechanisms across products, including post-interaction feedback capture, ticket-quality review and resolution-rate reporting, and used the findings to prioritise the next release.
- Defined and tracked product metrics per platform (resolution time, escalation rate, drop-off, adoption) and used them to justify roadmap decisions to client leadership.
- Delivered bilingual and multilingual products, coordinating content and localization workstreams alongside engineering.
- Led cross-functional teams of 11-13 across engineering, design, content and QA, running Agile ceremonies from discovery through UAT and go-live.
- Presented product proposals, solution architecture and roadmaps to non-technical stakeholders including government officials, bank leadership and enterprise clients.
- Worked within ISO 9001, ISO 27001 and ISO 20000-1 certified quality, security and service-management processes.

Frontend Developer

Sep 2020 – Jul 2021

Triofi Technologies Pvt. Ltd., Bengaluru, India

- Built customer-facing web applications in React.js, Vue.js and Nuxt.js, translating Figma designs into responsive, accessible interfaces.
- Partnered with UI/UX designers and backend engineers to improve usability and reduce friction in user flows.

Intern

2019 – 2020

Applied Cognition Systems Pvt. Ltd., Manipal, India

- Built an Employee/Customer Database and Management System using HTML, CSS, JavaScript and SQL.
- Gained hands-on experience in data modelling, CRUD workflows and requirement-driven development.

SELECTED PRODUCTS & PROJECTS

Conversational AI & Support Experience

- **WhatAStore — WhatsApp Business API Commerce & Agent Platform:** Product website, customer web app and an Admin-Agent Portal. Defined conversation flows, template messaging, agent inbox, assignment and the bot-to-human handoff with conversation history carried across.
- **AI Voice Agents for Hospitality (Sea View Hotel):** Voice agents for reception, in-room service and dining, with escalation to staff and automated post-interaction feedback calls.
- **Website Chatbots (Qamen Studio, VShop):** Deployed enquiry chatbots with response management dashboards for the client's team.
- **Parent-Student Communication System:** Hybrid WiFi/SIP telephony product with SIM fallback and a prepaid wallet, covering call routing, permissions and usage controls.

Customer Support & CRM Platforms

- **Electricity Board Complaint Management (MESCOM & GESCOM):** Consumer complaint registration, categorisation, routing, SLA tracking and resolution for two state utilities.
- **Co-operative Bank CRM (multi-phase):** Customer records, enquiry and service-request handling, and staff workflows for a co-operative bank.
- **United Toyota — Integrated CRM & HRMS:** Dealership platform covering the customer lifecycle from lead to service, plus employee lifecycle, attendance and payroll.
- **Property Operations Suite (Rohan Corporation):** Complaint and maintenance request logging, assignment and tracking, with a resident-facing mobile app.
- **Sainik Setu:** Services platform connecting senior citizens and ex-servicemen with verified providers, with request intake and verification workflows.

Platforms at Scale

- **Industrial Automation & Traceability Platform (Mysore Minds):** Manufacturing SaaS integrating ERP, machines and processes; led the traceability module.
- **Event Management Platform:** Web portal and tablet app for live events, judges' scoring and leaderboards, with offline support and sync.
- **Multilingual & Global Web Platforms:** Phil McArthur & Partners (multilingual corporate site with CMS), Hitachi Vantara microsite, EduCare Foundation (USA), MAHE SDG portal and a bilingual English-Kannada university portal.

EDUCATION

B.Tech, Electronics & Communication Engineering — Manipal Institute of Technology

2017 – 2020

Diploma, Electronics & Communication Engineering — Dr. TMA Pai Polytechnic

2014 – 2017
